June -

I will soon be moving
to Vermont and dairy country, in
the hope to grow most of my own
vegetables and fruit as well as
purchase uncontaminated milk,
other dairy products and meat.
But I am 70 years of age and
am more concerned for my grand-
children and their children. We
must stop producing quantity
in favor of quality.

Sincerely,

Mervin Rich

As a member of the Center for Science in the Public Interest (CSPI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.
